black marble	gold

We also stock a large range of 2 colour plastics. That is where we engrave through 1 colour to reveal the second colour underneath. You also have the option to have multi-colour fills on the same plate.

Some plastics are suitable only for indoor or outdoor use, others can be used anywhere. Be sure to let us know the type you need.

Our basic colour range is to your left, which covers a variety of colours such as black/white, red/white, yellow/black, etc.

We can supply glow in the dark plastics, great for those areas with poor lighting.

Our frosted acrylic range is especially popular. These are engraved from behind and paint filled. Then fixed to a base for stability.

We also stock metallic colours. These give the look of metal, but are actually a plastic. The brushed metallic colour is the surface colour, with either black or white underneath, depending on your choice.

Looking for a timber or marble look? We can help you with that also.
